

CONTROL CONCEPTS

ACCESSORIES

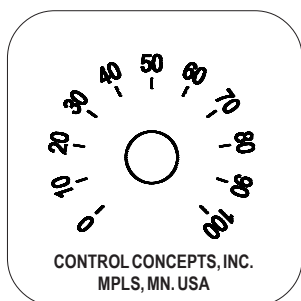

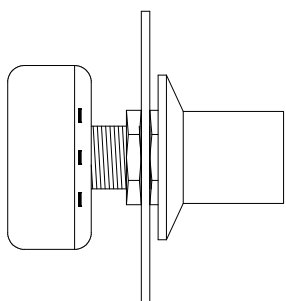

Description

Control Concepts, Inc. offers accessories required for special controller installations.

Potentiometer kits are available for run-idle installations.

Fan kits are necessary when using 70 Amp, 1600-PM2 or 1600-PM3, extensions as stand-alone, 2 or 3 leg controllers.

A DV/DT kit is available for use with Solid State Relays not incorporating internal transient protection.
